

# Wages Prediction: Project 4 Hackathon

### **DATA CLEANING**

- Limitations: 20 features
- Dummify & order by correlation
- Keep top 20 highestcorrelations

	Top 20 Features Selected	
wage -	1	
irried-civ-spouse		
education-num -	0.34	
age -	0.23	
hours-per-week -	0.23	
capital-gain -	0.22	Y
sex -	0.22	
Exec-managerial	0.21	
ın_ Prof-specialty	0.19	
ation_ Bachelors -	0.18	
ucation_ Masters -	0.17	
ition_ Prof-school -	0.15	
capital-loss -	0.15	
iss_Self-emp-inc	0.14	
ation_ Doctorate	0.13	
elationship_Wife -	0.12	
ass_Federal-gov -	0.059	
y_ United-States -	0.034	
:class_Local-gov -	0.033	
Self-emp-not-inc	0.03	
_ Protective-serv	0.028	
	wage	

# **Initial Exploration**

Getting a model set up: Logistic Regression (81%)

Additional explorations kept LogReg at the top of the leaderboard for some time (85%) Exploring Polynomial Features

# ADDITIONAL MODELS

	Training	Testing
Random Forest	0.526	0.488
KNN	0.504	0.374
SVM	0.859	0.854

### FINAL SUCCESS

#### Adaboost:

• Test: 0.862

Train: 0.869

#### XGBClassifier:

Test: 0.879

Train: 0.872

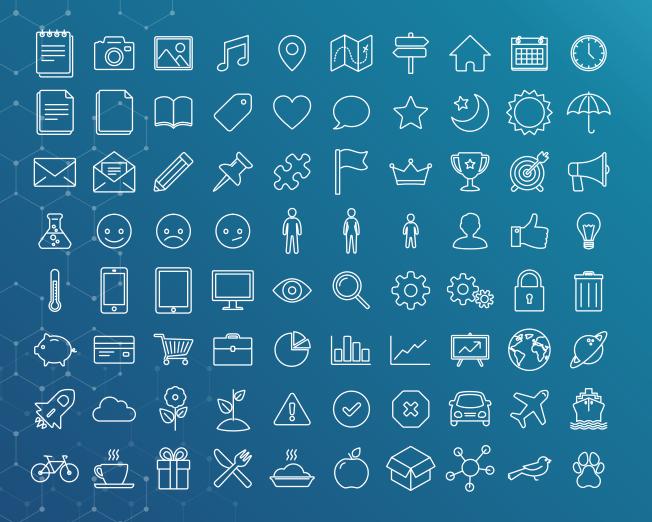

# THANKS!

Open for Questions & Comments

#### SlidesCarnival icons are editable shapes.

This means that you can:

- Resize them without losing guality.
- Change fill color and opacity.
- Change line color, width and style.

sn't that nice? :
